FY32

Red-bronze Y-strainer

with threaded female connections

APPLICATION

FY32 strainers are used in commercial and industrial applications within the limits of their specifications.

They protect systems against malfunction and corrosion damage resulting from the ingress of foreign bodies such as welding beads, sealing materials, metal cuttings and rust etc. This extends the life of the downstream system and prevents early failure.

SPECIAL FEATURES

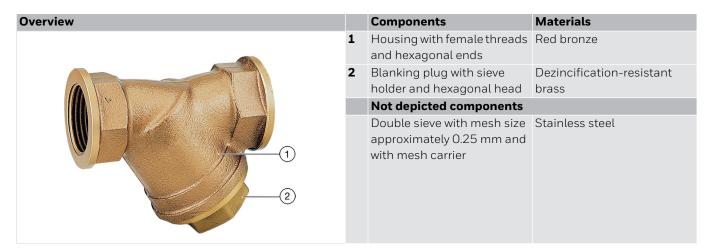

- Low flow resistance because of good dynamic flow design of body
- Brass and stainless steel construction gives good corrosion resistance
- Large strainer mesh surface area provides high dirt acceptance capacity
- Sieve carrier ensures good sealing within housing
- Easy removal of sieve for cleaning

TECHNICAL DATA

Media			
Medium:	Water, oil, compressed air and other non-aggressive mediums		
Connections/Sizes			
Connection sizes:	1/4" - 2"		
Pressure values			
Max. operating pressure:	16 bar for water, oil and compressed air		
Operating temperatures			
Max. operating temperature medium:	150 °C		
Specifications			
Installation position:	In horizontal or vertical pipework with blanking plug downwards		

CONSTRUCTION

METHOD OF OPERATION

The medium flows in the direction of the arrow through the FY32 and passes through the large surface double sieve from inside to outside. Dirt particles are trapped and collected by the double sieve. Accumulated dirt particles can then easily be removed during programmed cleaning of the strainer.

TRANSPORTATION AND STORAGE

Keep parts in their original packaging and unpack them shortly before use.

The following parameters apply during transportation and storage:

Parameter	Value
Environment:	clean, dry and dust free
Min. ambient temperature:	5°C
Max. ambient temperature:	55 °C
Min. ambient relative humidity:	25 % *
Max. ambient relative humidity	85 % *

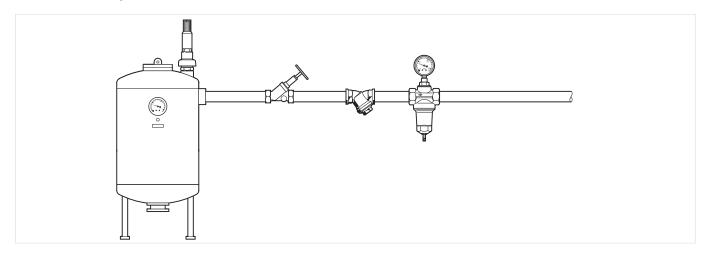

^{*}non condensing

INSTALLATION GUIDELINES

Setup requirements

- If possible install in horizontal pipework with blanking plug downwards
 - This position ensures optimum cleaning efficiency
 - Where installed in rising pipework dirt particles will not collect in strainer
- Install shut-off valves
 - Enables fast cleaning of the strainer
- Ensure good access
 - So that the sieve can be easily removed
 - Simplified maintenance and service

ORDERING INFORMATION

The following tables contain all the information you need to make an order of an item of your choice. When ordering, please always state the type, the ordering or the part number.

Options

The strainers are available in the following sizes: $^{1}/_{4}$ ", $^{3}/_{8}$ ", $^{1}/_{2}$ ", $^{3}/_{4}$ ", 1 ", $^{1}/_{4}$ ", $^{1}/_{2}$ " and 2 ".

- standard
